New assessment and data management solutions for schools

From staff reports

Read more by [eSchool News Staff](#)

Here are some of the latest innovations in assessment and data management for schools.

With a strong federal focus on assessment and accountability in education, many ed-tech companies have released new products designed to help educators test their students' understanding and track progress toward meeting state and federal benchmarks. Here are some of the latest innovations in assessment and data management for schools.

STI has announced the availability of a new Graduation Tracking System that can send administrators an automated message alerting them when students are at risk of dropping out of school.

Developed in partnership with Johns Hopkins University and the At-Risk Foundation, the software uses these organizations' biggest risk indicators—attendance, behavior, and course grades—to generate alerts. STI created the software for the state of Alabama, but it's now available free of charge to any STI customers as part of the company's Information Now student information system (SIS).
